

ESSB Showroom Poster Guide

Item	Visual Direction	Header	Body Copy
Poster 1: Ariel Overview	DONE	DONE	DONE
Poster 2: How It Works: Charging & Discharging	 Using this illustration. Use a 2-part split layout: Left side for <i>Charging</i>, right side for <i>Discharging</i>. Include simple infographic arrows showing water flow (warm water up, chilled water down). Use blue/red gradients for thermal difference.	How Ariel Thermal Energy Storage Works	Charging Mode: Discharging Mode: During peak hours or power outages, stored chilled water flows downward, cooling your system reliably.
Poster 3 – Smart Monitoring & Control	 Product photo of monitoring system.	Smart Monitoring, Smarter Decisions	Track performance in real-time with Ariel's Smart System. • Live temperature profiling • Predictive performance insights • Early fault detection Every Ariel tank is validated using Computational Fluid Dynamics (CFD). - Verified stratification stability - Optimized water flow - Consistent performance under real conditions

	Include a sample dashboard screen showing temperature profile.		
Poster 4 – Proven Performance & Credibility	Top Section – Accreditations & Vendors - Place the accreditation logos (ISO, Bumiputera, ASME, etc.) in one clean row. - Below, show <i>Registered Vendor</i> logos (TNB, TM, UEM, Sunway). - Keep this area clean, with white background and equal spacing. Middle Section – Real-World Projects - Use a photo collage (3–4 projects): Cyberjaya Data Centres, KL HQ retrofits, Berjaya Times Square retail. - Each project has a short caption: project name, scope, capacity/feature. - Include one large hero photo (maybe Cyberjaya CJ-01 or Berjaya Times Square) as the anchor visual. Bottom Section – Key Line - A bold statement tying credibility + track record together.	Header (Top): Certified. Trusted. Proven. Header (Middle): Delivering Reliability Across Industries	Body (Top): Accredited to ISO and ASME standards. Registered vendor with Malaysia's leading corporates. Body (Middle): Project Highlights (examples from your slides): Cyberjaya Data Centre Cooling – 72m³ chilled water storage, ASME certified. KL Corporate HQ IAQ Upgrade – Advanced air quality & filtration system. Menara Prestige Retrofit – Energy-efficient HVAC optimization. Berjaya Times Square – Chiller management system for a retail landmark. Footer Key Line: Ariel by Enlighted Solutions Proven engineering, trusted by Malaysia's top enterprises.
